

ICTSkills Studio (Summer School) 2016

Web Development Assignment

Student Name: J. Doe

Student Number: xxxxxx

Description of Application:

This assignment comprises an extension of the MyRent web app developed during the course by the addition of features described in a series of supplied stories. Write a brief non-technical description of what problem your application solves and how it solves it. State the final story number implemented.

Name of Hosting Company: For example: [Heroku](#).

Your application's URL (in the cloud):

Example: <http://org-wit-myrent.herokuapp.com/>

Your BitBucket remote references to:

- Donation,
- MyRent
- WitPress.

Example:

Donation: <git@bitbucket.org:doejohn/donation.git>

MyRent: <git@bitbucket.org:doejohn/myrent.git>

WitPress: <git@bitbucket.org:doejohn/witpress.git>

Please grant read access to usplitu@gmail.com for all three applications.

Please note that this accompanying document should not exceed one page. It should contain text only. It should not include screen shots.

Marks will be given for presentation.

Marks will be deducted if the content exceeds one page.
